

Retail and e-Commerce System

The **Y.E.S.!™ Software Suite** provides a complete E-Business solution including website design and creation, and Front Office & Back Office Systems, including International Currencies, Inventory Management and Control, Tax Calculation and a Point-of-Sale system. Y.E.S.!™ was designed so that you can have your website built and functioning online in only a few hours. Inventory management features allow you, the business owner, to fully track and manage your inventory sold either via the web or through your storefront. Y.E.S.!™ also supports day-to-day business operations such as the receiving, processing, and accounting of online orders.

Template-driven website design for flexibility. Y.E.S.!™ gives you, the merchant, complete control over how your website looks and operates. The design features of Y.E.S.!™ allow you to construct a professional looking, individualized company website. Starting with a base template, you can customize colors, fonts, company logos, page layouts and other areas of your website. An unlimited number of HTML pages, designed through the Y.E.S.!™ word processor-like HTML editor, can be added to sites to allow full control of the information presented on your site.

Y.E.S.!™ assists in total inventory control. Y.E.S.!™ allows you to track your inventory by accurately monitoring quantity levels and re-order points. The flexibility of the inventory management system supports warehouse inventory control and Just-In-Time ordering.

Y.E.S.!™ automates the entire order entry and fulfillment process. Y.E.S.!™ provides an easy and simple way to receive, process, and fill product orders. It also allows users to support storefront operations by including a full featured Point-of-Sale system. Y.E.S.!™ also integrates with today's most popular small business accounting packages, giving the user a complete business solution.
