

Complete, Integrated e-Commerce System

Y.E.S.! E-Commerce™ is an e-Commerce system featuring design templates, a full WYSIWYG HTML editor, a content management system, and a complete inventory control system. One click of the mouse is all it takes to retrieve and list all sales and orders placed on your customized web site, and to help expedite and automate order processing and fulfillment.

Each order is selected, reviewed, and then processed. Depending on the online customer's method of payment, you label the transaction as a cash sale (already received the funds) or invoice (bill the customer for the total). Billing and shipping labels, invoices, receipts, and packing slips can also be printed from this screen. Once the sale has been processed, with the click of the mouse, the inventory is automatically updated, and the customer, sales, and tax information is filed for accurate and complete record keeping.

Minimum System Requirements:

- Minimum CPU required: 300MHz
- Minimum memory required: 64Meg RAM
- Minimum hard disk space required: 500Meg
- Operating system versions supported: Microsoft® Windows NT/98/ME/2000/XP
- Minimum screen resolution: 800x600 (Highest Color Quality)
- CD-ROM speed: 4X
- **Intuit® QuickBooks®** 2003 or later, **QuickBooks®**, **QuickBooks Pro®** or **QuickBooks Premier®** Editions, Single User
